ACKNOWLEDGEMENT

We would like to express sincere gratitude to all those who supported us throughout journey and helped us successfully complete this report. We would also like to extend my gratitude to the department coordinator **Prof.YOGESH** Assistant Professor, Dept. of CSE for her continuous support and coordination throughout the Miniproject. Her efforts in ensuring a smooth and organized Miniproject experience for all participants have not gone unnoticed. We sincerely thank ***Dr. Shifana Begum***, Head of the Department, Computer science & Engineering, for being an inspiration and support throughout this project. We are extremely grateful to our respected Dean, ***Dr. Ramakrishna N Hegde***, for providing the facilities to carry out the project. I also extend my thanks to all teaching, non-teaching staff and management staff of the Computer Science and Engineering Department who have been helpful and cooperative towards the completion of the project work.

ABSTRACT

The Uber Rider app is a mobile-based transportation platform designed to provide users with a fast, reliable, and convenient way to book rides anytime and anywhere. By leveraging GPS, real-time data, and advanced algorithms, the app connects passengers with nearby drivers, ensuring efficient route planning and reduced waiting times. Users can select from a variety of ride options—such as economy, premium, and shared rides—based on their budget and travel needs.

The app offers key features including upfront fare estimation, live ride tracking, driver details, and multiple secure payment methods such as digital wallets, cards, and cash. It also incorporates safety measures like driver ratings, trip sharing, and emergency assistance options to enhance user confidence. Additionally, the Uber Rider app maintains trip history, provides customer support, and uses data analytics to continuously improve service quality.

Overall, the Uber Rider app exemplifies how digital technology can transform urban transportation by increasing accessibility, optimizing travel efficiency, and delivering a user-friendly mobility solution.
